

Enneagram II: An Advanced Understanding

This workshop is for those who have experienced the Enneagram Level I (or its equivalent). Each participant should have taken the Wagner Enneagram Personality Styles Scale (or make arrangements to take it prior to the Workshop). This workshop will explore the more subtle dimensions of each type's way of functioning, including "wing" influences, directions for growth and decline and the power of the "idealized self-image." The goals of this workshop are:

- To become more aware how other types in the system are part of one's primary type.
- To appreciate the influence of one's primary type and its "wing".
- To recognize the power of the primary type's idealized self-image in distorting its virtue.
- To apply the gifts of one's type to personal, relational and vocational areas of life.

Location: Christ Presbyterian Church
419 Deerfield Road, Camp Hill, PA 17011
